PROFESSIONAL PROFILE

Experienced software engineer with 4+ years in web development using JavaScript frameworks (Ember, Vue, AngularJS, Next.js, Gatsby) and libraries (React) as a frontend developer. Proficient in headless CMS (KeyStones, Contentful, Strapi), REST APIs, GraphQL, Git, Node.js, Express, and Python for backend development. Strong leadership skills with a track record of effective collaboration across all levels and functions. Skilled in Agile/Scrum methodologies using tools like Jira, Notion, Shortcut, Monday, ClickUp, and Trello. Adept Web Development Team Leader & QA Specialist with extensive workforce management and team leadership experience.

WORK EXPERIENCE

Frontend Web Developer
2023 - Applaudo Studios - El Salvador

Developed, released & maintained several apps in a monorepo project, guaranteeing flawless performance & exceptional user experience. This also empowered the company to retain its status as the leading provider of residential sale-leasebacks in USA, granting homeowners access to home equity without the need for relocation or debt, all made possible through our web solutions.

Frontend Web Developer
2023 - Applaudo Studios - El Salvador

Developed a web application for a social e-commerce platform, enabling users and businesses to send personalized gifts with messages through their mobile app. Utilizing React and Firebase. Delivered web version, expanding reach and functionality as of mobile.

Frontend Web Developer
2022 - SMBS Solutions - Managua

Developed and implemented a highly efficient web app for a private company, specializing in SalesForce, livePerson, Genesys Cloud and Zendesk web widgets integrations. This enabled seamless connectivity and data exchange. Successfully integrated the DeepL Translator API, streamlining multilingual communication across cases, emails, tickets, and web forms.

- Customer Focus

Frontend Web Developer
2021 - SMBS Solutions - Nicaragua

Developed an e-commerce web app for a private company specializing in selling parking tickets, offering food for delivery and pickup, and hosting popular fast food restaurants in movable posts or kiosks. One of my roles as frontend developer involved utilizing micro-frontends to enhance user interactions within the application.

Frontend Web Developer
2021 - Private Agency - USA

Successfully collaborated and implemented UI enhancements on a web app for a US car dealer, streamlining operations. Automated tasks, boosting productivity, and led budget planning for better financial management and cost optimization.

Frontend Web Developer
2021 - Monyta - Australia

Provided UI enhancements for a sleek web app to efficiently oversee client sales bots, leading prospects through a streamlined process via speech or chat. Leveraged AI models & scripts for enhanced web interactions, boosting sales conversions and revenue on client's site.

Frontend Web Developer
2021 - Solid Logix LLC - USA

Participated in the initial planning, wireframing, & concept development for a Recruitment & Applicant Tracking Web App. Utilized Balsamiq for key concepts & initial screens. Implementation probably took placed after I resigned from this company.

Frontend Web Developer
2020 - Solid Logix LLC - USA

Created a top-notch Web App, optimizing API performance by measuring payload size, request duration, routing, and status codes. I also set up a Cron Job-based monitoring system for automated performance tracking, and designed a user-friendly interface for efficient analysis, boosting optimization efforts.

Frontend Web Developer
2019 - Solid Logix LLC - USA

Designed, implemented, and maintained a Virus Study Testing tool for multiple US laboratories and their branches. Managed virus testing study reports and statistics. Established a unique brand identity for customer web apps and ensured continuous support and maintenance.
